Full Stack Software Engineer · Backend Systems · Fintech · Cloud

SUMMARY

Software Engineer with 1.10+ year of production experience at TCS on the HDFC fintech engagement, building high-availability payment systems and microservices in Java and Spring Boot. Delivered measurable outcomes: ~99.9% payment transaction reliability, ~35% API latency reduction, and zero critical security vulnerabilities in pen-testing. Strong foundation in DSA, system design, and secure coding. Actively expanding into Go and cloud-native architecture (AWS Certified).

TECHNICAL SKILLS

Languages: Java · Python · Go · JavaScript · SQL · C++

Backend: Spring Boot · Django · Django REST Framework · Microservices · REST APIs · JWT · J2EE · Servlet · JSP

Frontend: React.js · HTML5 · CSS3

Databases: PostgreSQL · MySQL · MongoDB

Cloud & DevOps: AWS (Certified) · Docker · Jenkins CI/CD · Git · GitHub · Maven · Postman

CS Fundamentals: Data Structures & Algorithms · System Design · OOP · Time & Space Complexity · Secure Coding

Practices: Agile / Scrum · Unit Testing · Code Review · Performance Tuning · Penetration Testing

EXPERIENCE

Software Engineer · Tata Consultancy Services (TCS) , Bangalore

2024 – Present

- Integrated third-party payment APIs and gateways with fault-tolerant validation and retry logic, achieving ~99.9% transaction reliability in a high-stakes fintech production environment.
- Instrumented backend microservices with structured logging and performance metrics, reducing average API response latency by ~35% and improving system observability.
- Designed scalable backend workflows in Java / Spring Boot to process high-volume financial requests, maintaining consistent throughput and zero data-loss under peak load.
- Engineered secure RESTful APIs with JWT authentication, RBAC, input sanitisation, and centralised exception handling; contributed to achieving zero high-risk vulnerabilities in security audits.
- Delivered 10+ sprint releases across DEV / UAT / PROD via Jenkins CI/CD pipelines; partnered with QA, DevOps, and HDFC stakeholders in Agile planning, retrospectives, and live production triage.

Software Development Intern · Lets Game Tech, Coimbatore

2023

- Contributed to end-to-end game feature development using Go and Java; conducted technical research on emerging frameworks and authored system design documentation that accelerated new-developer onboarding.

Software Development Intern · Botroid Technologies, Nilgiri's

2022

- Built and debugged backend features; produced architecture documentation for 3 core product modules, improving cross-team knowledge sharing and maintainability.
-

PROJECTS

Harmoniq – Music Streaming Platform

Spring Boot · React · PostgreSQL

- Built production-quality REST APIs for song upload, streaming, playlist management, and artist dashboards using Spring Boot, handling 1K+ requests/month.
- Implemented JWT-based RBAC for artist and listener roles with optimised media delivery endpoints, cutting streaming latency by ~30%.
- Integrated structured logging and performance monitoring for end-to-end observability across all API surfaces.

Secure Web Application — SQL Injection Prevention

Java · Spring Boot · MySQL

- Designed and built a hardened backend using parameterised queries, strict input validation, and multi-layer RBAC to eliminate injection attack vectors.
- Achieved zero high-risk findings across full penetration testing and security audit cycles — directly translatable to financial-grade compliance standards.

News Aggregator API

Python · Django REST Framework

- Engineered RESTful aggregation APIs across multiple external news sources using DRF serializers, viewsets, and generic views with filtering, search, and pagination.
- Reduced database round-trips by ~40% via queryset prefetching and lazy loading, improving throughput under concurrent load.

EDUCATION

Master of Computer Applications (MCA)

Indira Gandhi National Open University (IGNOU) *Expected 2026*

Bachelor of Science in Computer Science · 8.8 / 10 GPA

Karpagam Academy of Higher Education, Coimbatore *2021 – 2024*

CERTIFICATIONS

AWS Certified Developer – Associate — Amazon Web Services

Data Structures and Algorithms — NPTEL & European Open University

Artificial Intelligence — European Open University

Java Data Structures and Algorithms — Udemy & LinkedIn Learning

Java Programming — Udemy

Git — Udemy

SQL — SkillRack

Digital Marketing — Google
